

Secondary Late Activity Bus

The Secondary Late Activity Bus is a service that is provided for those students who “reside in rural areas that are distant from school” and for those students who reside in an area where the service area is not served by transit.

The late bus connection back to their community will be provided at a central bus stop located at elementary schools and community centres. Late buses cover a large geographical area and parents/guardians will need to arrange to get their children home from centralized stop locations. **Any bus stop changes, or additions must be approved by NSTS Operations Manager or NSTS Assistant Executive Director. Schools, Operators, Drivers and NSTS Coordinators do not have authorization to alter stop locations or add new stops.**

These routes follow a designated route path to provide consistent drop off times at scheduled stops and are available in the school portal.

All the same school bus rules apply for late activity buses as home to school buses.

Students will be required to sign into their student portal and sign up for the late bus under the “Secondary Late Bus Sign-up” app and will need to show proof of sign-up to the late bus driver. Students are also asked to inform the Centennial main office that they will be taking the late bus.

Please see the schedule below for late activity bus runs from Welland Centennial.

Late Activity Bus Schedule
